# SAFETY FIRST!

Before you begin making your own candles, we've got some safety stuff to cover.

- Protect your work area with newspaper or wax paper.
- Put down newspaper or paper towels to protect.
- A grown-up assistant should handle any materials that are being heated.
  - Put any leftover materials in the garbage, not down the sink.
  - If you accidentally get hot water on your skin, run the affected area under cold water immediately. In case of serious burns, seek medical attention!

# THINGS YOU SHOULD KNOW

**A**

Heat wax chunks in a double boiler until the wax is completely melted.

**B**

Add essential oils, fragrances, or candle dyes to your wax once it's completely melted.

**C**

Position a wick in the center of a heat-proof container, then pour the melted wax into the container.

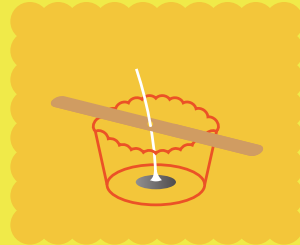

**D**

Cool the candles for 24 hours (or until completely hardened) before use.

# STEP-BY-STEP

1. Place a wick in the center of the candle mold.
2. Melt the wax with the melting pot. Gently stir while heating.
3. Carefully transfer the wax liquid into the mold.

4. Add some colour. You can also mix 2 or more colours to form new color if desired.

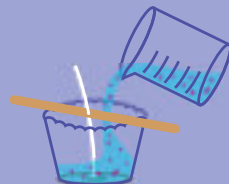

5. Drop appropriate amount of fragrance to create sweet-smelling.

6. Gently stir the mixture until well mixed.

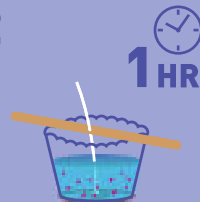

7. Let the wax cool completely, it takes around 24 hrs.

8. Get your own fragrant candle!
